

Stay Calm and Breathe

Belly Breathing Exercise¹

Belly breathing can be done anytime you need to relax or relieve stress.

1. Sit or lie flat in a comfortable position.
2. Put one hand on your belly just below your ribs and the other hand on your chest.
3. Take a deep breath in through your nose, and let your belly push your hand out. Your chest should not move.
4. Breathe out through pursed lips as if you were whistling. Feel the hand on your belly go in, and use it to push all the air out.
5. Do this breathing 3 to 10 times. Take your time with each breath.
6. Notice how you feel at the end of the exercise.

4-7-8 Breathing Exercise¹

Try this exercise to relax either sitting or lying down.

1. To start, put one hand on your belly and the other on your chest as in the belly breathing exercise.
2. Take a deep, slow breath from your belly, and silently count to 4 as you breathe in.
3. Hold your breath, and silently count from 1 to 7.
4. Breathe out completely as you silently count from 1 to 8. Try to get all the air out of your lungs by the time you count to 8.
5. Repeat 3 to 7 times or until you feel calm.
6. Notice how you feel at the end of the exercise.
